

CIVIC & INFRASTRUCTURE INTELLIGENCE FOR DIGITAL INDIA

BharatSanket AI (भारत संकेत)

**Empowering 1.4 Billion Citizens with Multimodal AI Vision, Multilingual Voice/Text
Grievance Resolution & Geospatial Governance**

PRIMARY AI ENGINE

Google Gemini 2.5 Flash Multimodal

SPATIAL INTELLIGENCE

Mapbox GL JS Vector Heatmaps

CLOUD INFRASTRUCTURE

Firebase Firestore + Node.js

TARGET REACH

Smart Cities & Municipal Corporations

The Civic Crisis: Broken Grievance Pipelines in India

Linguistic Exclusion

- **Language Barrier:** 22+ official languages and hundreds of regional dialects across India.
- **Bureaucratic Forms:** Citizens are forced into complex English dropdowns and paperwork they cannot understand.
- **Disenfranchisement:** Rural, peri-urban, and low-literacy communities are completely locked out of digital civic governance.

Verification Void & Spam

- **35%+ Wasted Capacity:** Municipal inspection teams dispatched blindly to vague, duplicate, or fake complaints.
- **Zero Visual Verification:** Traditional portals cannot analyze photos to confirm if potholes or hazards actually exist.
- **Duplicate Overload:** Hundreds of citizens submit tickets for the same broken main, clogging the triage queue.

Municipal Blindspots

- **Disconnected Silos:** Roads, Water, Electricity, and Sanitation operate without unified geospatial coordination.
- **No Predictive Warnings:** City commissioners lack aggregated demand data to prepare for monsoon drain failures.
- **Broken Trust:** Tickets disappear into black holes with no real-time transparency or SLA auditability.

BharatSanket AI: The Unified Civic Intelligence Ecosystem

1. Multilingual Natural Language Parsing

- Accepts freeform citizen grievances in Hindi, Tamil, Telugu, Kannada, Bengali, Marathi, Gujarati, English, and more.
- Gemini 2.5 Flash extracts core intent, severity (1-5), and standardized English summaries in under 2 seconds.

2. Multimodal Vision Verification

- Directly inspects uploaded mobile photos to cross-verify physical damage against the text description.
- Calculates confidence scores, flags blurry or fraudulent photos, and calibrates hazard severity on ground reality.

3. Automated Geolocation & Clustering

- Auto-extracts local landmarks, street names, and approximate coordinates even from informal descriptions.
- Renders dynamic Mapbox GL heatmaps and clusters neighborhood demand to prevent duplicate work orders.

4. Executive Municipal Briefing Engine

- One-click generative synthesis for Municipal Commissioners, Mayors, and Ward Officers.
- Provides critical safety risk assessments, priority SLA actions, and optimized budget allocation advice.

Under the Hood: Multimodal Gemini AI Pipeline

Step 1: Input Ingestion

- **Citizen Capture:** Audio voice note, typed dialect message, or camera photo.
- **Geospatial Context:** Browser GPS coordinates combined with extracted vernacular landmarks.
- **Pre-processing:** Multi-part stream packaging for low-latency transmission.

Step 2: Gemini Multimodal

- **Multimodal Inspection:** Simultaneous vision + semantic analysis via Gemini 2.5 Flash.
- **Ground-Truth Validation:** Detects potholes, exposed cables, water bursts, and sanitation piles.
- **Fraud Mitigation:** Flags unrelated selfies, random indoor objects, or AI-generated fakes.

Step 3: Smart Dispatch

- **Real-Time Sync:** Push to Firebase Firestore with instant WebSocket broadcast.
- **Automated SLA:** Automatic routing to relevant municipal department (PWD, Water Board, etc.).
- **Public Feed:** Neighbors receive notifications and can upvote to confirm urgency.

Unified Portals: Citizen Empowerment & Official Command

Citizen Experience Portal

- **Zero-Friction Filing:** Single-input complaint box with audio & camera integration.
- **Visual AI Confidence Badge:** Immediate badge showing verified hazard status & severity score.
- **Democratic Upvoting:** Upvote nearby neighborhood reports to aggregate community demand without clutter.
- **Live Status Stepper:** Transparent progress tracking: *Pending* → *In Progress* → *Resolved* with officer notes.

Official Command Center

- **Interactive Mapbox GL:** Full geospatial view with clustered demand pins, severity filters, and satellite layers.
- **SLA Dispatch & Audit:** Officers update work status with verification notes and official sign-off signatures.
- **Departmental Analytics:** Interactive donut charts and breakdown by Roads, Water, Power, Sanitation.
- **Executive Export:** Instant generation and print export of Municipal Briefings for council meetings.

Automated Executive Briefing for Municipal Leadership

Situational Overview

- **Real-time Synthesis:** High-impact executive headline condensing hundreds of ward grievances.
- **Citywide Triage:** Immediate breakdown of critical (severity 4-5) vs pending vs resolved cases.
- **Citizen Sentiment:** Aggregated citizen frustration index and localized demand hotspots.

Proactive Risk Matrix

- **Hazard Detection:** Highlights imminent threats to life (exposed electrical wiring, toxic overflows).
- **Monsoon Resilience:** Identifies recurring drainage blockages before flash flooding paralyzes traffic.
- **Departmental Accountability:** Spotlights lagging municipal contractors and SLA bottlenecks.

Resource & Budget Allocation

- **3-Point Action Plan:** Immediate operational directives for field engineering teams.
- **Strategic Capital Deployment:** Recommendations for targeting emergency contingency funds.
- **Quantified Impact:** Projected citizen beneficiaries (e.g. 150,000+ residents impacted).

Full-Stack Cloud Architecture Built for Pan-India Scale

Frontend Layer

- **React 18 & Vite:** Lightning-fast SPA with sub-second page loads.
- **Tailwind CSS:** Polished dark-mode civic interface with glassmorphism effects.
- **Framer Motion:** Seamless layout transitions and micro-animations.
- **Mapbox GL JS:** Vector maps with custom clustering and viewport controls.

Backend & Storage

- **Node.js & Express:** Scalable REST API with structured middleware.
- **Firebase Firestore:** Realtime NoSQL cloud database for instant complaint propagation.
- **Firebase Auth:** Secure Role-Based Access Control (Citizen vs Official).
- **Multi-Cloud Deployment:** Vercel Serverless & Google Cloud Run container-ready.

AI & Intelligence

- **Google Gemini 2.5 Flash:** High-throughput, cost-effective multimodal vision & NLP.
- **Multilingual Translation:** Zero-shot comprehension across 10+ major Indian scripts.
- **Automated Geocoding:** Heuristic reverse geocoding with coordinates estimation.

Measurable Social Impact & Pan-India Scalability

INDIAN LANGUAGES SUPPORTED

Social & Administrative Impact

- **Democratized Voice:** Gives voice to citizens irrespective of language or literacy level.
- **Cost Savings:** Saves municipal authorities thousands of man-hours spent sorting spam or duplicate complaints.
- **Public Accountability:** Transparent public audit trails rebuild civic pride and government responsiveness.

Pan-India Roadmap

- **Phase 1 (Now):** Web & Mobile PWA with Gemini Vision & Mapbox Geospatial Core.
- **Phase 2:** WhatsApp & Telegram Conversational AI Bots for zero-download rural grievance filing.
- **Phase 3:** PM Gati Shakti & Smart Cities Mission API Integration for contractor billing compliance.
- **Phase 4:** Drone & Street-View AI integration for automated civic defect detection.

Transforming Indian Governance, One Signal at a Time

Working Prototype & Repository

- **GitHub Repository:**
<https://github.com/jeevan-rp/bharatsanket-ai>
- **Full-Stack Architecture:** Client + Express Server + Firebase + Gemini AI.
- **Production Ready:** Modular codebase with automated database seeders, role guards, and API proxies.

Demo Evaluation Credentials

- **Citizen Portal Account:**
Email: citizen@bharatsanket.in | Password: [Demo@123](#)
- **Government Official Command Center:**
Email: official@bharatsanket.in | Password: [Admin@123](#)
- **Try Multimodal Filing:** Submit a complaint in Hindi or Tamil with a damage photo to see instant AI verification!
